

# Simulation for Health Care Education and Practice

فقيه

كلية فقيه للعلوم الطبية  
Fakeeh College for Medical Sciences

By the end of this course,  
the participants will be able to:

- 1 Describe principles and strategies towards managing students' stress and cognitive load in simulation.
- 2 Outline the frameworks for debriefing and approaches for optimizing Simulation- Based Learning and patient safety in Healthcare settings.
- 3 Develop a simulation scenario and simulation-based team emphasizing the role of simulation in teaching and learning of integrated curricula.
- 4 Differentiate between different types of fidelity in simulation and different modalities.
- 5 Demonstrate proper electronic resources search skills, time management skills, effective teamwork and effective communication skills using verbal and non-verbal methods.

## Speakers:

Dr. Sarah Eltouny  
Dr. Amira Salem  
Medical Education department

## Target candidates:

All health care specialties.

The course will be conducted  
within three months

(Sept 01, 2021 - Dec 01, 2021)  
9:00 am - 11:00 am
